

St David's Medical Foundation, in partnership with the
College of Medicine, is proud to host the inaugural

Dr Janina Hopkin Medical Lecture

An annual distinguished guest lecture at the College of Medicine, open to all

Tuesday 23rd September 2014

5.30pm, Grove Lecture Theatre, Grove Building
College of Medicine, Swansea University

"50 years on from thalidomide - what's new in birth defects?"

**Guest Speaker: Dr Patricia Boyd
National Perinatal Epidemiology Unit
Oxford University**

Dr Patricia A Boyd. Patricia Boyd studied Medicine at University College London and went on to specialise and work in the areas of fetal and placental pathology, clinical genetics and prenatal diagnosis. From 1992 to 2007, she was clinical geneticist for prenatal diagnosis in Oxford. In 1991 she established the congenital anomaly register in Oxford and went on to contribute prominently to BINOCAR (British Isles Network of Congenital Anomaly Registers) and to EUROCAT (European Surveillance of Congenital Anomalies). From 2007 to 2013, she was based at the National Perinatal Epidemiology Unit at the University of Oxford and was President of EUROCAT from 2008 to 2010. She has studied, in particular, the effectiveness of different prenatal screening policies on clinical practice and outcomes.

Followed at 6:30pm with refreshments
